RECYCLABILITY CERTIFICATE

After evaluation according to the "Harmonised European laboratory test method to generate parameters enabling the assessment of the recyclability of paper and board products in standard paper and board recycling mills", known as "CEPI recyclability laboratory test method", in its 2nd version of october 2019.

Celabor certifies on date **17 / 06 / 2024** that the sample
ECH-202403040: "Thermoformable paper tray"

As provided by **Plastienvase SL**

has obtained a score of:

29 / 100

according to 4Evergreen's recyclability evaluation protocol (beta version).

The sample is assessed **suitable for standard mill recycling.**

The method indicates that the sample has **some significant repulpability issues** that have a significant impact on the process in the standard mill and should therefore be avoided when possible. Furthermore, it presents **no adhesion issues** and poses **no visual quality issues**.

This certificate is valid for a period of **up to 6 months after publication of the final version of the 4evergreen recyclability assessment protocol**
